# What do Data Beholds

- Every Business is producing Data and crunching the Data makes you understand the Business that you never knew existed before
- Data Driven Decision Making
- What are the high Days and low Days of Business?
- Why Big Bazar started Wednesday Markets?
- How to identify a returning customer?
- How to measure business using KPIs
- What are the Bottlenecks of a Business?
- All these questions about a business lies in the Data But how do we find answers to these Questions?

# Every Business has its own Story to tell

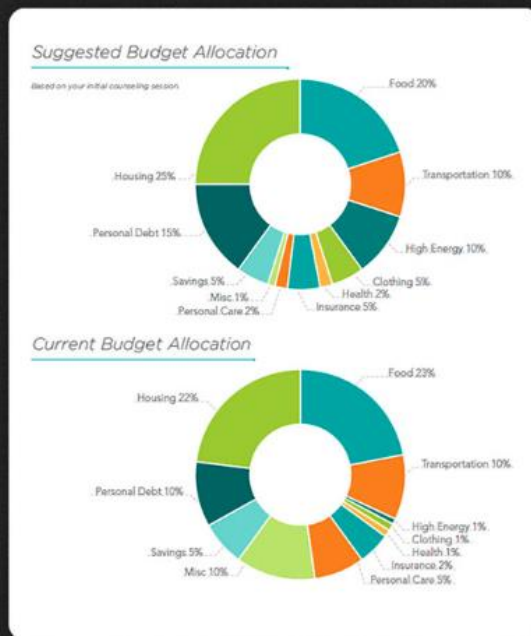

- Data is just collection of Facts and Dimensions
- But when Sliced and Diced correctly, you can always tell a very good story
- But what is the best way to tell a Story?
- How many of you read Tinkle? I still remember Shikari Shambu, Supandi, Kalia the Crow. What is great about them?
- It is not just a story but the characters are very realistic. They had a profound effect on me.
- I have always been a fan of telling a story with pictures in my childhood
- But my Professional Experience is not much different
- I still try to tell stories but by DATA VISUALIZATION

# Why Data Visualization

Which Tells a better Story?

# Lets click on the URL and see what it has to offer

<https://luminocity3d.org/WorldPopDen/#3/13.75/49.04>

- With one Map and a Legend, this website tells a lot about the Density of the World's Population
- First take away, the Population is not spread across all over the world but is concentrated at only few points
- Southern Asia has high density of Population
- Zoom in to understand that each City level density of the Data
- All of this in one interactive image
- That's the power of Visualization

# Why Tableau?

- How many of you want to Travel in a Driverless Car?
- I am in just for the thrill and also I don't know how to drive a Car
- For me the “Janjhat” of driving will be solved
- Same why introduction of Tableau made Data Visualization a Layman term
- You need not know all the technicalities to start working on Data
- You need not write Queries also. Tableau writes them for you
- Tableau will even suggest a graph for you
- Tableau helps you share your DATA STORY with the world
- Data Analysis has become PLUG and PLAY

# Gartner's Magic Quadrant

Leader from the past 7 years in a market where you see new BI tool every other day

# Tableau Journey as I see

Tableau has three phases according to me

- Pre 10.5
- 10.5 to 2020.1
- 2020.2 and above

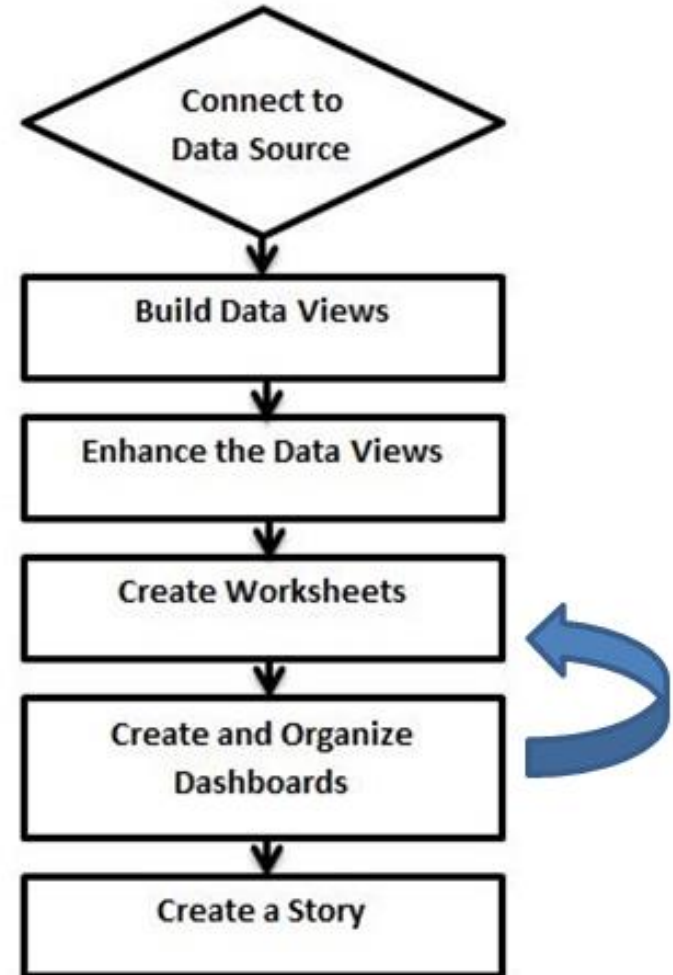

Till 10.5 Tableau is just like any other BI tool for me but from 10.5 with LODs, I started fantasizing Tableau and with introduction of Relationships in Tableau, I am madly in love with it.

You can call this course **Tableau - my Love Story**

# Want more...

- VIZQL - DIY kit for Data Analysis
- .hyper - Bullet Train in Data Engines
- Columnar Database Model - High Data compression
- Cross DB Joins

# Design Flow in Tableau

# Scenario-Based Tableau Training

# What is Scenario-Based Tableau Training?

- Any Tool has two parts of Learning
  - Theoretical Understanding of the Tool
  - Industry level application part of the Tool
- So, Training is divided into two Parts
  - Self Paced Videos - Theoretical Part of Tableau
  - Live Sessions - Scenario-Based Implementation part of Tableau
- What does the Scenarios Cover?
  - Scenarios that reinforce the Tool understanding
  - Most common Scenarios in Real Time
  - Complicated Scenarios that make your resume stronger
  - If you have any Scenario - We can Discuss in the Sessions

# What does your Live Sessions look like

- Every Friday evening, Self Paced videos of the Sessions are provided along with the Scenarios that you need to address
- In live Sessions first all your Doubts will be addressed and then Scenarios are discussed with a step by step approach to solution
- Also if you saw a Scenario somewhere and want to discuss, you are welcome

# What Bonus do you get in this Training

- Social Profile Building - LinkedIn and Tableau Public
- Interview Help
- Strong Resume Points
- Access to a Telegram Group containing all my Trainees
- Monthly Doubts Session once the Training is provided
- A process to address your complicated Real-time Scenarios

# Agenda of the Course

# Module 1

- Tableau Introduction
- Tableau Products
- Data Types
- Data Connection-Live, Extract
- Dimensions and Measures
- Parts of the Tableau View
- Building the Basics
- Understanding the granularities and its effect on Tableau
- Multiple Dimensions and Measures in View
- Types of Axis and their Use Cases
- Blended Axis
- Dual Axis

## Module 2

- Building Maps and Understanding Geographic Analysis, Custom Geocoding
- Edit locations in maps
- Filtering Concept
- Quick Filters
- Date Filters
- Context Filtering and its area of implementation
- Data Source Filters and Extract Filters
- Parameters
- What are Sets and their implementations
- Binning the Measures
- Grouping the Data
- Hierarchies

# Module 3

- Functions in Tableau
  - Number Functions
  - String Functions
  - Date Functions
  - Type Conversion Functions
  - Logical Functions
  - Aggregation Functions
- Basic Calculations
- Cascading Filters
- Sorting the Data in Tableau

# Module 4

- Basic Charts in Show Me and marks card
  - Shapes
  - Background Images in Tableau
  - Page Shelf and Animations using it
  - Sorting the Data in Tableau
  - Dashboards
  - Stories
- Actions
    - Filter Actions
    - Highlight Actions
    - Format Options
    - URL Action
    - Set Actions
    - Parameter Actions

# Module 5

- Level of Detail Expressions
- Relationships in Tableau and its implementation
- 8 R's of Relationship
- Joins in SQL and Tableau
- Basics of Data Blending
- Issues with Data Blending and Solutions
- Understanding Window Calculations in Tableau
- Types of Table Calculations
- Manual Table Calculations
- Addressing Field and Partitioning Field
- Filtering using Table Calculations
- Advanced Calculations
- Period over Period and Period to Date Calculations
- Regular Expressions in Tableau

# Module 6

- Advanced Charts
- Reference Types
- Reference Lines
- Reference Band
- Reference Distribution
- Box Plot
- Order of Operations
- Spatial Analysis
- Forecasting the Data
- Trend Lines

# Module 7

- Tableau Server
- Mini Project
- Resume Preparation
- Interview Tips

\* Doubts session every Saturday 10 AM

# Tableau Products

Tableau products are majorly divided into 3 types

1. Data Cleaning Tools - Tableau Prep
2. Building tools - Tableau Desktop and Tableau Public
3. Sharing Tools - Tableau Server, Tableau Online, Tableau Reader, Tableau Mobile

# Tableau Licensing
